

To,
Mr Hasit Ruparel
Intranet Services,

Hasit (Internet Services) did a very professional job building our ecommerce website.

He was in touch with me every day while the site was being built to keep me up to speed on the progress.

He made a great effort to explain aspects of ecommerce website development I knew very little about and include me on key decisions being made.

Other website design companies I worked with always operated on their own schedule and I did not feel they were responsive to the needs of my company.

Although we are separated by a great distance and many time zones, I was impressed that (Hasit) was able to respond faster and more effectively than the local programmers I used before. So thank you.

Kind regards
Parker Burroughs
