Recommendation Letter for Hasit Ruparel, Intranet Services

Dear Sir:

Anue Systems is a fast growing startup company in Austin Texas. We design, manufacture and sell Network Emulators, which are used to test optical networks and network equipment. Our customers include IBM, AT&T, Cisco, NTT and Merrill Lynch.

We started working with Hasit Ruparel at Intranet Services in May, 2004. Hasit was recommended to us by another successful business here in Austin. We are extremely happy with Hasit's work! The work he has done on our website has been very valuable to our sales and marketing efforts. As a result, we have continually expanded our level of involvement with Intranet Services. They now manage all of our website activity, including all modifications, search engine optimization and spam reduction.

Intranet Services has conducted two major revamps of our website in the past 17 months, as we have grown our business. Our number of web pages has tripled. More importantly, through Hasit's work to get our website optimized and positioned with major search engines, our traffic has increased significantly. We have approximately five times as many daily visitors today than we did when we began working with Hasit!

Hasit is great to work with. He is responsive, intelligent and creative. His prices are also much lower than US based web service firms. I would recommend Hasit highly to any organization looking for web services, especially for growing businesses that require expertise and fast turnaround.

Sincerely,

A handwritten signature in black ink that reads "Kevin Przybocki". The signature is written in a cursive, slightly slanted style.

Kevin Przybocki  
VP Sales & Marketing
