

TO WHOM IT MAY CONCERN

GTE contracted Internet-services in October 2009 for designing a website (www.egovta.com) for the Economic Development through e-Governance Programme (eGEP) which is a joint initiative of GTE and the Standardisation Testing and Quality Certification Directorate (STQC) of the Department of Information Technology.

We would like to put on record our appreciation for the work done by Harit and his colleagues on this assignment. The team was responsive to our design preferences and to the nature of information we wanted to place on the site.

Govta.com has helped us to connect to eGEP stakeholders in a quick and engaging way and has helped us to use select tools such as social media to publicise the programme and its key aspects.

We would be happy to work with Internet-services in future.

Warm regards,

Harit Kulkarni
