Where Innovation Takes Shape

December 15, 2004

To Whom It May Concern:

I received Intranet Services name from a client who was very excited about their search engine optimization work. We have seen our website gradually drop in rankings over the years on the keyword terms for our industry and we wanted to reverse that trend. Once we hired Intranet Services, our ranking moved up hundred's of positions in a matter of weeks and we are approaching a #1 ranking in a very competitive category. We moved to the #1 spot for another keyword term in just 3 days after Intranet Services took us "live". We are now starting to see the results of this work in increased website traffic and RFQ's. We are adding one or more customers almost on a daily basis. Internet Services' work has lowered our acquisition cost per customer to a fraction of the costs for typical sales activities.

Hasit and his team are very easy to work with and they do an excellent job applying their expertise to your individual business. If your business can benefit from being #1 in the major web search engines, then I would highly recommend Intranet Services.
